Development Tools:	GitHub, GitLab, Visual Studio Code, PyCharm, Postman

Education

University of Cincinnati

MEng in Computer Science

Aug 2024 – Present

Backstage Pass Institute of Gaming and Tech

BSc in Computer Science and Game Development

June 2024

Experience

Web Development Intern

Jan 2024 – June 2024

SkyinfoLab Software Solutions, Hyderabad, India

- Designed, developed, and implemented dynamic websites using Python, enhancing back-end functionality by efficient code structuring.
- Collaborated with a cross-functional team to integrate front-end and back-end web solutions.
- Worked in the development of critical modules, ensuring adherence to project timelines and boosting team efficiency through clear communication and code reviews.
- Enhanced web design and problem-solving skills, streamlining existing codebase and reducing system bugs by Python best practices.

Projects

Ecommerce Web Application

handmadehub.onrender.com

- Developed an eCommerce platform using Django and React, with features like shopping cart, secure user authentication, and payment integration.
- Built product review and rating systems, product search, and a carousel for top products to enhance user experience.
- Designed user profiles for seamless order tracking and developed an admin dashboard for efficient user, product, and order management, reducing admin processing time.
- Engineered a seamless checkout process with payment integration via PayPal
- Developed a responsive design and scalable architecture, improving load time and supporting peak user activity without performance lags.

Technologies Used: Django, React, React-Bootstrap, RESTful API, PostgreSQL, JWT, PayPal API.
